EV300 Level 2 Charging Station

Convenient and fast home charging

Designed for easy installation and low maintenance, the Bosch EV300 Level 2 AC Charging Station is a compact, yet powerful charger, providing 32A capacity and charging up to 4 times faster than with a standard EV cord.

The EV 300 is UL listed and tested to all applicable industry standards and built to be weather-resistant. That means whether installed indoors or out, this charger will safely and reliably charge in rain, snow, sleet, ice -- or in the comfort of your garage or limited workspace areas.

EV300 Level 2 Charging Station

Benefits

- ▶ Ideal for Residential/Garage Installation (indoor or outdoor)
- ▶ Easy to install and use
- ▶ LEDs provide current charging status
- ▶ NEMA 14-50 plug pre-installed
- ▶ NEMA 3R-rated enclosure for indoor or outdoor installation (outdoor installation requires in-use cover over receptacle)
- ▶ Compact design ideal for areas with limited space (indoor and outdoor)
- ▶ Includes tamper resistant mounting bracket
- ▶ Easy to manage 16' cable
- ▶ Adjustable current limit (set at installation) for electrical panels with limited capacity
- ▶ Up to 4 times faster than a standard wall outlet
- ▶ SAE J1772 charging connector is compatible with all EVs in North America
- ▶ 3-year warranty

Compact

The small, compact and lightweight (less than 9 pounds) design is ideal for areas with limited space. The EV300 also includes a shorter 16' cable where space is at a minimum.

Flexibility – Hardwired or Plug-In

The EV300 includes a mounting bracket and screws to permanently mount the unit, with the option to also be used as a plug-in charger and movable as needed.

Plug and Go – No app necessary to use

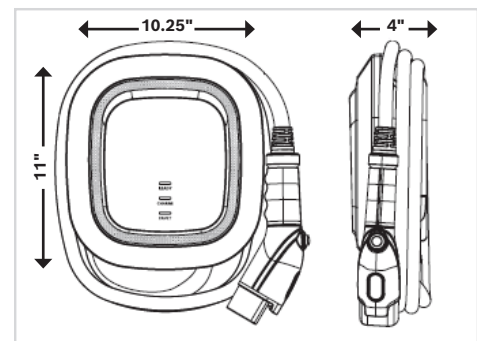

Did you know? Many Level 2 Chargers advertise dedicated apps as necessary to monitor your vehicle charging, when actually the EV vehicle interface can do the same thing. EV vehicles already allow you to pre-set times and length of charging, view status of charge, time needed to fully charge battery and more. No app needed.

Safety

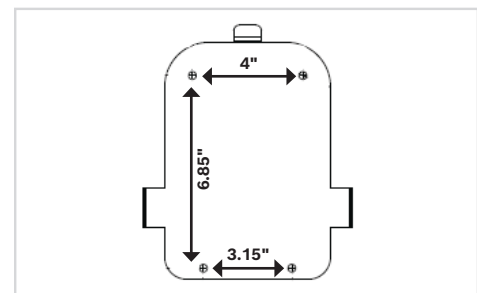

All Bosch EV chargers are fully UL and cUL listed. This is extremely important when you are talking about high currents and voltages with EV vehicles and charging in or near your home and garage. Many products include only certain components that are UL listed which is not the same. Be sure to use an EV charger like the Bosch EV300 that's fully UL listed.

Quality

We guarantee our product with our industry leading 3-year warranty.
